

Keton Consulting Trainings 2023

ISO15189:2022 & Allied Trainings

BACKGROUND OF THE COURSES

ISO 15189:2022 Medical Laboratories – Requirements for quality and competence has now been published. ILAC has agreed a three-year transition period, at the end of which all providers accredited to ISO 15189:2012 worldwide must have been assessed and accredited to the new standard ISO 15189:2022.

Special focus has been given to risk management aligned to the requirement of ISO 22367, laboratory safety, sample collection and transport and incorporation of POCT. Other areas of refresher training include Method validation, Measurement Uncertainty, Risk Management, Internal Audit among others. At the end of the courses, implementation of QMS based on ISO/IEC 15189:2022 should be seamless.

WHY TRAIN WITH KETON GROUP

We have seamlessly delivered QMS aligned training to different nationalities for complex and simple organizations over the years and to date, over 2500 laboratory professionals have trained with us covering Kenya, Uganda, Tanzania, Zambia, Nigeria, Ethiopia, and Nigeria.

Our training professionals have worked closely with major accreditation bodies as assessors and trainers for various quality management schemes and have properly been updated as resource persons for standards bodies, accreditation bodies, certification bodies and trainer of trainers and have traceability to major accreditation bodies in Africa and Europe.
